I am currently pursuing a Higher Diploma in Computer Science and possess over two years of experience in Front-end Development, along with proficiency in various front-end development tools and frameworks. I have a sound knowledge of Reactjs, JavaScript. My proficiency in these technologies has enabled me to build real-world applications for startups. Additionally, I possess experience in browser-based debugging and performance testing software and excel in troubleshooting complex issues.

EXPERIENCE

Front-end Developer

Jan 2024 - Present

Freelance, Lagos

- I orchestrated a remarkable system for a private business owner, which enables customers to easily search for distributors located nearest to them. I utilized advanced Excel sheets as the database, which efficiently queries data for all the different features and sections of the application.
- Collaborated to develop an event management application for a startup. I oversaw the authentication and authorization of users. Implemented this feature using Firebase Google's auth service.
- Accomplished with a team of developers a dosage reminder system for the Nigerian health sector in the 2024 Cavista Hackathon, I oversaw all the user interface and CRUD operations.

Front-end Developer- Intern

Mar 2023 - Jul 2023

Yaba college of technology, Lagos, Yaba

- Implemented a user interface for the school's website transcript request section. I collaborated with other interns to create an intuitive and user-friendly interface. Streamlined request process for graduates. Well-received by stakeholders and improved user experience.
- I acquired proficiency in using ReactJS to develop single-page applications (SPA) .
